

LABlearning project. Youth Department. Municipality of Salt.

Most research as well as everyday evidence confirms the general impression of the existence of a general mismatch between the media culture of young people in the new generations and the classroom didactics, the traditional way of organizing education in EU throughout centuries. Moreover, much evidence indicates that these groups of young people are, in fact, able to learn, and quite talented.

But they learn differently than the standard-students of the traditional education system.

The project aims to deliver concrete models of media based didactics to prevent drop-out, early school leaving and poor learning results.

The project takes the learning into the media world of youth at risk, instead of asking them to leave their media world and enter the old classrooms: laboratories in the project.

The final aim is to offer quality inspirational material to teachers and institutions.

The laboratories use technology as learning tools. Laboratories are characterized by teams of youth which will work outside the classroom:

- they are challenged with open problems they need to learn about
- they organize the learning in collaboration with teachers, mentors and community resources
- they independently use technology to search, explore, combine, organize and present the knowledge produced
- the teams choose independently the state of the art technology
- teachers and mentors collaborate as counsellors

Concretion of the facilities involved as a laboratories during the academic year 2012-2013 in Salt. Timetables.

IES, Institute VALLVERA

The labs will take place every
Tuesday and Thursday
Tuesday: 10:50 to 11:50.
Thursday: 08:20 to 10:20

10 youth of the Vallvera Institute
will be involved in the lab.

Fundació Ser.gi. LINK program

*SER.GI Foundation works to improve the quality
of life of minority groups or who encounter difficulties
in their personal, family or social.
The LINK program aims to improve the school succes
and fight against drop out of young school learners.*

*The labs will take place every
Monday and Wednesday from 11:00 to 13:00*

*The group of youth will be located in "La Estació Jove"
facility.*

LA FABRICA

*Leisure centre aimed at young people between 14 and
18 years. Meeting place for the youth, cultural and
recreational activities are planned.
The activities are decided by the young people
themselves, two social workers are responsible for
carrying them out.*

The labs will take place every Tuesday and Thursday from 16:30 to 18:30

The laboratories began on September 24.

A teacher from the ERAM College is in
charge of the laboratories as a trainer.

All works created by the youth will be subtitled.

Still thinking in the different possible ways to disseminate the works, ideas and results of the youth involved.

At the moment from Salt some ideas are proposed: press; facebook (public presentation, lip dub); presentation at festivals, for example the Girona film festival...

Thank you very much to all the mentors, teachers and community workers for their work, deep involvement and dedication. Without their enthusiasm would not be possible.

Many thanks for the photos that laboratories sent us. They are only a small testimony of what is happening there....
